

intervals. These comprise the regular publications of the Arnold Arboretum. An issue of *Arnoldia* titled, "The Walter Street 'Berrying' Ground" was prepared by Mrs. Mary Lehmer, formerly of the Arboretum staff. This reviewed the history of the Walter Street Church and its adjacent cemetery now included within the boundaries of the Arboretum. Although remains are visible of the church, a memorial plaque, along with thirteen old headstones and a crypt, mark the Revolutionary War dead and are decorated each Memorial Day by the historic commission of Boston. This article, which drew attention to a remote section of the Arboretum, is one of a projected series of articles on the history of the land we occupy. Another number of *Arnoldia* issued at the dedication of the Dana Greenhouses has been requested frequently by other botanical gardens and by architectural students.
